ANNUAL REPORT OF MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program. An operator conducting mining operations under a Notice of Intention must file an annual operations and progress report (FORM MR-AR) with the Division.

I. GENERAL INFORMATION

1. Report Time Period: From (mo./yr.) 1/88 To (mo./yr.) 12/88.
2. DOGM File Number (original notice): M / 037 / 001
3. Mine Name: Lisbon Mine
4. Mineral(s) Mined: Uranium Ore
5. Name of Operator or Company: Rio Algom Mining Corp.
6. Permanent Address: LaSal Route
Moab, Utah 84532
7. Company Representative (or designated operator):
Name: Robert S. Pattison
Title: Manager
Address: Lisbon Mine, LaSal Route, Moab, Utah 84532
Phone: (801) 686-2216

☐ Please check if any of the above information has changed since previous year.

II. MINING AND RECLAMATION

1. Was the mine active during the past year? Yes ☒ No ☐
2. If active, how much ore or mineral was mined? 117,370 dry tons

3. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, volume of material moved, and the acreage affected.

Fifteen surface drilling sites were prepared. Thirteen were actually used for underground exploration and the project was abandoned because of dismal results on 13 Sep 88. All sites have now been reclaimed and seeded to BLM specifications.

4. Briefly describe the reclamation work performed during the past year. This description should include acreage reclaimed, methods employed, and an evaluation of the results.

Surface drill sites were reclaimed as explained above. The Lisbon Mine was finally closed and allowed to flood on 4 Oct 88. Concrete plugs were poured at the collars of both shafts and the ventilation shaft area is now 80% reclaimed, with the headframe, fence, etc. now removed.

5. What was the total unreclaimed acreage at years end? about 3.
6. Briefly summarize mining and reclamation planned for the upcoming year.

We will complete the reclamation at the ventilation shaft and will pour the remaining 2 ft. of concrete at the production shaft collar. It is unlikely, at this stage, that the production shaft headframe will be torn down within the next 12 months. If this is changed we will let you know first.

NOTE: Section III., "Additional Information" applies only to large mining operations.

III. ADDITIONAL INFORMATION

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted. None
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached. None

IV. SIGNATURE REQUIREMENT

I hereby certify that the foregoing is true and correct.

Signature of Operator: R. S. Pattison

Name (Typed or Print): R. S. Pattison

Title of Operator: Manager,

Date: 31 Mar 89.
